Configuration: Anti theft device, horn, tool kit under the seat, floorboard and engine cover
Security: Mechanical parking brake
Lights: homologated halogen headlights
Electronics: Multifunctional control unit - ignition, selected gear and electrical system

SPORT QUAD

PROFILE

- Sportive, leightweight and super fast
- Nearly undefeated in competitions
- Smooth as a cat
- Maximum performance and optimum handling

SPORTIVE CHARACTER

Your DVX may have less motor displacement than your buddy's 450, but just imagine the satisfaction you get when you prove you are faster in a tight woods race through the trees, just as quick on the motocross track, and better yet, paid a fraction of his cost for being competitive.

The five-speed manual transmission (with reverse) produces clean and quick shifts no matter how much you hammer on it.

Crack the throttle and you'll know instantly what 400 sport-class power is all about.
